

As an R.N. who has worked in medicine for 45 years, I am pleased to recommend Dr. H. Wei for her professional work in acupuncture. She is thoroughly trained in her profession and is able to diagnose problems. She will treat several problems for the same fee.

The various medical problems for which I have received treatment are listed below. I am highly pleased with the results of her treatments, and highly recommend her work.

Linnea Megibow, R.N.

1. I suffered from a Trigger Finger, left middle finger. After treatment it was cured.
2. After a fall in which I suffered a severe lower back injury, I was told by a medical doctor to have cortisone injections, use pain pills, and use a cane. There was no improvement. After treatment by Dr. Wei, I had less pain and was able to give up the cane and pills after one week.
3. For severe sinus pain I had two treatments. The sinus drained and I have had no pain since.
4. I have had eczema for many years. On my feet and legs the itching was severe. After one treatment, there was no more itching.
5. An old fracture gave pain in my left knee. After a treatment this has much improved.
6. For Carpal Tunnel Syndrome in my right hand an M.D. recommended using a brace and future surgery. After two treatments by Dr. Wei, my hand is much improved and I have no pain.
